

Hands off Assata Shakur!

THE FACTS ARE OUT, NJ TROOPER LIED

THE REAL FACTS

- ① The finger print analyses of every gun and every piece of ammunition found at the scene showed there were no fingerprints of Assata found on any of them. (The official analyses admitted into evidence)
- ② Neutron Activation Analysis taken immediately after Assata was taken to the hospital that night showed **there was no gun power residue on her hands.** Effectively refuting the possibility that she had fired a gun. (The official analyses were admitted into evidence)
- ③ As a result of the bullet Harper shot under her armpit, **while her arms were raised** in, her median nerve was severed, immediately paralyzing her entire right arm, shattering her clavicle, and lodging in her chest so close to her heart that an operation to remove it was not feasible. A neurologist testified to that fact at the trial.
- ④ A pathologist testified that **"There is no conceivable way that the bullet could have traveled over to the clavicle if her arm was down. That trajectory is impossible."**
- ⑤ A surgeon testified that **"it was anatomically necessary that both arms be in the air for Ms. Chesimard to have received the wounds she did."**

The state offered no expert witnesses to refute this medical testimony.

Source: Attn. Evelyn A. Williams; New Jersey crime laboratory in Trenton, NJ; FBI crime laboratories in Washington, D.C.

Trial transcripts of his [New Jersey State Trooper James Harper] testimony at both Sundiata's and Assata's trials where he **admitted, under cross-examination, that he had lied in all three of his official reports and in his Grand Jury testimony.**
